Creative and driven programming student doing the last term before I graduate as a Game Programmer. I have a background in the fashion industry, having worked in retail stores and co-founded a brand. I enjoy working both independently and in teams, and thrive in both.

SELECTED PROJECTS

Drag Rush

Built animation trees for the vehicles. Helped overhaul our beat conductor for better BPM precision. Also did level design.

Dispater

Built the systems that drive the story forward, including dialogue, voice lines, tasks, and interactions.

Floor Zero

Made a modular interaction interface, together with a key/door system. Built a competent AI using UE's NavMesh.

SwingSpace

First solo project. Built a swing mechanic and hooked up a live global leaderboard with Firebase.
